Three people – a small factory owner, a captain, and a professor – find themselves in the same place for three different reasons: the factory owner is there to meet a "friend," the captain to purchase war equipment, the professor to pick up the proofs of his latest book. But what exactly is this place? A discreet and comfortable hotel, a business location, or a publishing house?

A sequence of unexpected events provokes a humorous dialogue between the three personalities, centered on the important themes of life and death, destiny, predestination and free will, the existence of God, and atheism.
